EDUCATION & RELEVANT COURSES

University of Illinois Urbana-Champaign – School of Information Sciences *Expected Graduation: Dec 2026*

Bachelor of Science: Information Sciences + Data Science

GPA: 3.65/4.00

Minor: Computer Science

- **Coursework:** Data Structures, Machine Learning, Database Systems, Text Information Systems
- **Certification:** Microsoft Certified: Fabric Data Engineer Associate (DP-700)

EXPERIENCE

Data Engineering Intern – Middleby Corporation – Elgin, IL

May 2026 – August 2026

- Developed and maintained ETL/ELT pipelines across **Azure Data Factory, Synapse, and Microsoft Fabric**, migrating legacy brand data into a Bronze/Silver/Gold medallion architecture (SQL, Python)
- Engineered feature pipelines enriched with the **Yelp API** to support a dynamic pricing model, and researched data governance implementation using **Microsoft Purview**
- Diagnosed and resolved SDK integration issues (Python versioning, Entra ID authentication, dependency conflicts) to keep Fabric and Azure pipeline workflows production-ready
- Independently designed, built, and deployed an AI-powered data validation platform (**Python, Streamlit, Microsoft Fabric Data Agents**) spanning 3 source systems and 35+ tables, featuring an anti-hallucination “trustworthiness guard” and an executive dashboard that surfaced data-quality issues including 39% of warranty records missing a required field; packaged for non-technical distribution via SharePoint

PROJECTS

MediScope: Hospital Performance & Quality Analytics Platform

Spring 2026

- Integrated four CMS healthcare datasets into a relational SQL database covering ~5,000 U.S. hospitals
- Designed a normalized schema with primary/foreign keys supporting multi-table joins
- Wrote advanced SQL queries to aggregate mortality, readmission, and satisfaction metrics
- Developed a Hospital Quality Index scoring engine that ranks hospitals on normalized metrics

Wine Quality Classification Using Machine Learning

Fall 2025

- Cleaned and merged 6,000+ red and white wine records to predict quality from physicochemical features
- Built and evaluated **K-Nearest Neighbors** and **Decision Tree** classifiers, using **k-fold cross-validation** and hyperparameter tuning, achieving best test performance with KNN (Cohen’s $\kappa \approx 0.55$)
- Applied **feature scaling**, train/validation/test splits, and model selection to handle class imbalance

LEADERSHIP

Member of Technical Staff, Agentic AI@UIUC – Champaign, IL

Fall 2025 – May 2026

- Collaborated on a multi-agent AI system delivering real-time game, player, and team insights
- Contributed to retrieval-augmented generation (RAG) workflows grounding LLM outputs in sports data

Assistant House Manager – Alpha Epsilon Pi – Champaign, IL

April 2023 – May 2025

- Maintained house facilities through regular inspections and coordinated improvement projects

SKILLS & INTERESTS

Programming: Python, SQL, C++, Kotlin, JavaScript, HTML

Cloud & Data Engineering: Microsoft Fabric, Azure Data Factory, Azure Synapse, Azure Data Lake, Microsoft Purview, ETL/ELT Pipelines

Data Tools: Pandas, NumPy, Scikit-learn, Streamlit, Plotly, Matplotlib, Seaborn

Other: Data Quality Validation, Data Cleaning, Machine Learning, LLM Applications & Prompt Engineering

Interests: New York Sports, Chess, Fantasy Basketball, Video Games, Reading, Weightlifting, Swimming
